

“Comprehensive Aesthetic Dentistry - From Planning to Delivery”

Dr. Charlie Ward and Dr. Christopher Mazzola

Tentative Schedule

1. Photography, Diagnosis and Treatment Planning - 90 min
2. Prep Design and Provisionals - 90 min
Break for Lunch
3. Anterior esthetic materials - 90 min
4. Bonding and Cementation - 90 min

- **Course Description and Learning Outcomes**

- Aesthetic dentistry requires attention to detail and intentional planning from start to finish. This course will walk through the steps needed to plan, prepare and deliver a comprehensive aesthetic case. We will begin with diagnosis, treatment planning and the importance of photography, then follow with prep design, provisionals and materials. Finally, we'll discuss protocols for bonding and cementation for modern ceramics.
- **Learning Objectives**
 - Demonstrate a system for aesthetic diagnosis and how to plan for an aesthetic case
 - Discuss predictable tooth preparation for modern materials and the importance of exquisite provisionals
 - Review material properties and what is appropriate for case selection
 - Demonstrate the step by step for bonding and cementation of modern ceramics
