

## **Infection Control Plus Bloodborne Pathogens**

### **Course Objectives:**

OSHA requirements include an annual retraining session for all employees. This course will help fulfill these requirements & will update participants on the latest from OSHA, including the Globally Harmonized System (GHS) for Hazard Communication. The course also covers the Bloodborne Disease Pathogens Standard and the Centers for Disease Control & Prevention Infection Control Guidelines for Dentistry. Other topics include requirements in the areas of fire, noise, ventilation, egress, ionizing radiation and workplace violence.
